Objective	Motivated MERN Stack Developer with over 1 year of experience building scalable, high-performance web applications using React.js and Next.js. Expert in state management (Redux, Zustand) and API integration, with a strong focus on clean architecture and responsive UI design. Proven track record of collaborating in agile teams to deliver production-ready solutions.
Skills & abilities	• Front-end Development • Back-end Development • React.js • Node.js • Express.js • MongoDB • Next.js • Redux • Redux Toolkit Query (RTK Query) • Zustand • Database Management • Version Control • Deployment • Communication and Collaboration • Problem-Solving • Laravel • PHP • MySQL • TypeScript • WordPress
Experience	AMETZO TECHNOLOGIES Full Stack Developer (December 5, 2024 – Present) • Surprez – E-commerce Admin Dashboard & Backend Platform – Designed and developed a production-ready e-commerce admin dashboard and backend using Next.js (App Router), TypeScript, and MongoDB (Mongoose). Implemented a clean architectural separation with frontend and API routes in the app/ directory and a dedicated server/ layer for models, services, media handling, and business logic. Built reusable admin CRUD patterns, role-based access control, and dynamic SEO management aligned with industry standards. • Menu & Order Management System – Built a full-stack solution (Next.js TypeScript, Node.js/Express, MongoDB) with menu CRUD, seasonal item pricing, cart flow, order assignment to suppliers/delivery staff, and real-time order notifications. Implemented RBAC with permission-driven UI, Excel reporting (xlsx), and optimized MongoDB queries for performance. • Accounts Management Application – Developed a store management system for sales, purchases, and payment tracking. Enabled invoice/receipt generation, profit/loss reports, and automated customer-based calculations. • Receiver & Caller Apps Backend + Admin Dashboard – Designed API endpoints (Node.js, MongoDB) and an admin panel (Next.js TypeScript) for managing users, receivers, reports, transactions, and redeem requests with secure authentication and role-based access control. • Next.js + Laravel Project – Developed and maintained a Next.js (TypeScript) frontend with a Laravel backend/admin panel, including scalable REST APIs, MySQL database operations, and secure authentication/authorization.

- **WordPress Projects** – Delivered high-performance, SEO-optimized, and responsive websites for multiple clients using Elementor and custom WordPress tools.

MERN Stack Developer Intern (August 5, 2024 – November 5, 2024)

- Developed responsive user interfaces, optimizing performance for an enhanced user experience.
- Ensured cross-browser compatibility using frameworks like React.js and Next.js.
- Managed server and database operations to support seamless functionality.
- Integrated APIs for efficient data communication across systems.
- Implemented security measures using Node.js and MongoDB to ensure data safety.
- Collaborated with the team effectively, showcasing strong problem-solving, communication, and time-management skills.
- Contributed to front-end and back-end development, delivering high-quality results within deadlines.

VI (VODAFONE IDEA) DISTRIBUTION

Direct Sales Executive

- Communicated effectively with diverse customers, ensuring clear understanding and building trust.
- Managed multiple tasks and meetings efficiently to achieve sales targets on time.
- Adapted quickly to market changes, customer needs, and product updates.
- Built and maintained strong client relationships, fostering repeat business and referrals.
- Worked collaboratively with team members to meet goals and improve overall performance.

FEDERAL BANK – CHAVAKKAD BRANCH

Temporary Bankman

- Communicated professionally with staff and visitors to ensure smooth office operations.
- Organized and managed filing and record-keeping tasks, ensuring accuracy and timely updates.
- Assisted in daily office duties, contributing to a well-coordinated work environment.
- Worked as part of a team to support operational efficiency and meet deadlines.

Projects

- **Surprez – E-commerce Admin Dashboard & Backend Platform** (<https://surprez-admin.vercel.app/>)
Built a **scalable e-commerce admin dashboard and backend system** using **Next.js (App Router)**, **TypeScript**, and **MongoDB (Mongoose)**, following **real-world production architecture** and clean separation of concerns.

The application leverages the **Next.js app/ folder structure** for frontend pages and backend API routes (app/api), while maintaining a **dedicated server/ layer** responsible for database schemas, business logic, services, validation, and media management. This structure ensures maintainability, clarity, and long-term scalability.

- **Admin Credentials**
 - **Username:** superadmin
 - **Password:** A@123456

Key features include:

- **Admin management for categories, subcategories, products, inventory, users, roles, and permissions**
- **Role-based access control (RBAC)** with permission-driven admin UI
- **Dynamic SEO management** using reusable embedded schemas, allowing admin-editable SEO for products, categories, subcategories, and static pages
- **Reusable admin CRUD patterns** with consistent form, view, and listing components
- **Centralized media handling** using a shared embedded media schema
- **Soft-delete and activation workflows** using **isActive flags**
- **Well-structured Mongoose schemas** with relations and indexes

This project demonstrates **senior-level full-stack development practices** using **Next.js as a full-stack framework**, with strong emphasis on architecture, data modeling, and long-term maintainability.

- **Movie Ticket Booking Application** (<https://moviepass-dennynj.onrender.com/>)
The full-stack application comprises the Admin Dashboard, Theater Owner Dashboard, and User

Dashboard, all integrated within the same URL and differentiated by distinct login credentials. You can access the different dashboards using the following credentials.

- **Admin**
 - Email: admin@gmail.com
 - Password: 123456
- **Theater Owner**
 - Email: keshu@gmail.com
 - Password: 123456
- **Regular User**
 - Email: dennynj4748@gmail.com
 - Password: 123456

➤ **Ecom Admin Dashboard**(<https://ecom-project-fullstack.onrender.com/>)

A full-stack e-commerce website that integrates the front-end, back-end, and database. It features a user-friendly dashboard for adding, editing, and deleting products, with images stored on Cloudinary.

➤ **Personal Portfolio Website** (<https://dennynj.vercel.app/>)

This website was developed and deployed to develop the skills in React

Used to Bootstrap and its icons to customize the frontend

Done validation across the website using JavaScript

To create websites that are optimized for all devices and can adjust to different screen sizes, ensuring a seamless user experience.

Also able to create a seamless multipage interface experience through the website

➤ **Text-2-Images** (<https://text-2-image.netlify.app/>)

[Experience Text2Image, the tool that converts text into stunning visuals, in our trial version. Customize styles, colours, and layouts to create unique artwork. Please note, that our trial version may have occasional issues. Join our community and start visualizing your words today!]

This website was developed and deployed as part of an assignment to understand the JavaScript language (including the functions, APIs, and event listeners)

➤ **Mi Store Website Copy** (<https://dennyneelamkavil.github.io/Mi-Store/>)

This project is completed as a part of learning HTML and CSS

Education

- ❖ Certificate in Full Stack Web Development (MERN Stack) from Entri
- ❖ B.Sc. Mathematics with Physics (2019-2022) from ST. THOMAS COLLEGE (AUTONOMOUS), THRISSUR (Active Backlogs)
- ❖ DCA (Diploma in Computer Application)
- ❖ CWPDE (Certificate in Word Processing and Data Entry)
